PART II

INTRODUCTION

In this Report for the school year ending June 30, 1959, statistics for those towns on the 8-4 plan of organization are so reported. In the case of towns having the junior high school unit, the statistics are reported (in accordance with a ruling of this department for more uniform classification) on the 6-3-3 plan.

In the case of cities or towns having the 6-2-4 system, superintendents have allocated statistics, both financial and vital, to fit in with the 6-3-3 or the 8-4 plan.

There are some school systems organized on the 6-6 basis—the high school offering six years of work. It has been necessary in these cases to allocate the seventh and eighth years with the elementary schools or to report a six-year elementary school system and divide the financial and vital statistics of the high school into three-year junior high and three-year senior high school groups. Columns 51-53, inclusive, designate the exact plan of organization in effect in each city or town.

TABULATION OF SCHOOL RETURNS

EXPLANATION

The tables beginning on page 4 give the principal items in the annual school returns from the 351 cities and towns of the Commonwealth.

To find any particular city or town use the index on pages 2 and 3.

In the table the cities and towns are divided into four groups, and arranged within each group in the order of population, as follows:

	Index Numbers
Group I. Cities	1-39
Group II. Towns of 5,000 population or over	40-154
Group III. Towns of less than 5,000 population and maintaining public high schools	155-259
Group IV. Towns of less than 5,000 population and not maintaining public high schools	260-351

It is to be noted that—

(1) All per capita, with the exception of those in the tables on elementary schools, junior high schools, high schools, and column 47A, are based upon the *net* average membership in the public schools.

(2) The rank of each city and town on the basis of the per capita expenditure is for the particular group in which it is classed. For the State rank of each city and town, see Graduated Valuation Table, the last table of this compilation.

(3) In computing the amount raised by local taxation for the support of the public schools, all reimbursements received from the State on account of school expenditures, and all contributions received from sources other than local taxation, have first been deducted from the total expenditure.

The columns containing any particular item have the same number throughout the table. They contain the following data:
